Ordering Information

FOUR EASY WAYS TO PLACE AN ORDER WITH KEY SURGICAL

It's easy to place an order with us – we're available to take your order by telephone, fax, e-mail or EDI. If you would like a standard form to fax an order to us, simply visit **keysurgical.com** for a form that is easy to download.

❶	EDI	**via GHX**
❷	E-MAIL	**order@keysurgical.com**
❸	TELEPHONE	**800.541.7995**
❹	FAX	**952.914.9866**

TERMS OF PURCHASE

No minimum purchase required (customized products excluded). Domestic orders received by 4:30pm CST will ship the same day (excludes custom orders and various surgical instruments). All shipments are FOB Eden Prairie, Minnesota, USA. Our No-Risk Return Policy, allows you to try our products for 30 days and return them if you are not completely satisfied. The No-Risk Return Policy does not apply to the following: used, customized, or sterile products as well as K-wires and Steinmann Pins. All product returns are subject to a restocking fee. Approved credit terms are Net 30 from date of invoice.

We also accept Visa, Mastercard, and American Express. Although our prices are subject to change without notice, we take pride in offering competitive pricing.

❶	TELEPHONE	**800.541.7995**

THE KEY SURGICAL STORY

Key Surgical was founded in 1988 by three entrepreneurial women with years of experience in both the nursing profession and the medical supply industry. Motivated by the growing need for a single-source supplier that would provide excellent customer service, the partners began building an extensive product line based on market need. The goal was to serve the varied needs of hospitals, surgical ambulatory, and outpatient centers as completely and as quickly as possible.

Over 30 years later, the same customer-driven principals and patient-focused values upon which Key Surgical was founded continue to guide everything we do. With over 3,000 of the highest quality products available to customers worldwide, Key Surgical is poised to continue to be a compassionate industry leader for years to come.

OUR MISSION

Our mission at Key Surgical is three-fold. First, to hire and retain good people who understand that nothing happens until a customer decides to buy something from us. Second, to grow by providing the quality products, value and service that our customers want, when they want them. And finally, to be good citizens by providing a rewarding and fun place for employees to work and sharing the benefits of our growth with the community in which we operate.

A NOTE ABOUT QUALITY

There are no shades of gray in the medical marketplace when it comes to quality. Key Surgical is committed to manufacturing and distributing the highest quality medical products, and to maintaining the highest level of compliance to FDA and ISO regulations. Nobody can claim to be perfect, but we strive to continuously improve our processes and systems so that we will always be closer to perfect tomorrow than we are today.

LETTER TO OUR CUSTOMERS

Thank you for being our customer and for allowing us to be your trusted partner for sterile processing and operating room supplies. Customers vote with their purchasing decisions, and we know that to earn your vote, we need to continue to set the standard for quality, customer service, and value.

Our customer base of hospitals, GPOs, surgery centers, and distributors continues to expand to over 10,000 locations in the United States and in 70 other countries around the world. We're committed to continuously making substantial investments in our products, quality system, regulatory and compliance efforts, and operations with the goal of being the easiest company to do business with. Our goal, as it was 30 years ago when Key Surgical was founded, is to supply you with the products you need, deliver them when you want them, and support you with personalized customer service. Although seemingly simple, focusing on delivering an exceptional experience with us every step of the way is, and will continue to be, the foundation of why we do what we do.

Our mission has three simple parts and we hold ourselves to be true to it every day. First, we will hire and retain good people who understand that our business exists because customers decide to buy something from us. Second, we will grow by providing the quality products, value, and service that our customers want, when they want them. Finally, we will be good citizens by providing a rewarding and fun place for employees to work as well as sharing the benefits of our growth with the community in which we operate. Combine our mission with our steadfast focus on improving patient safety through products and education and you have what makes up Key Surgical.

Our entire team works hard every day to be recognized by you as a company of dedication, honesty, and integrity. In striving toward that recognition, we promise to keep our feet planted firmly on the ground and to make sure we brighten both your day and ours in the process. If we can ever be of assistance to you please call or email us directly. Businesses grow because they do the right things for their customers and their employees. We intend to keep doing those things and to keep growing, and we truly appreciate your business and thank you for continued support.

Sincerely,

Scot Milchman
Chief Executive Officer

Brian O'Connell

KEY SURGICAL INSTRUMENT PROTECTION

Instrument Tip Caps are designed to extend the life of your instruments. Our tip caps protect your valuable instruments from unnecessary wear or damage, helping reduce repair costs while giving you the peace of mind that your instrument investment is being protected. In addition to protecting and extending the life of your valuable instruments, tip caps also help to protect sterilization packs from puncture and protect employees from sharp instruments.

Available in a variety of shapes and sizes to fit all your instrument protection needs, we have the perfect tip cap for each of your various instruments – from skin hooks to scissors to osteotomes – and they are available with or without vents, depending on your preference.

Our tip caps are radiopaque, single use, and compatible with steam sterilization.

Instrument Sleeves are designed to protect various delicate instruments using an easy-to-fold design. Sleeves are single use, and compatible with steam and gas plasma sterilization.

Duraholder® Instrument Protection System (IPS) is available in several configurations to fit your instrument protection needs within a closed container or set. Duraholders help you organize and prepare your various instruments for steam sterilization in one convenient pouch.

KEY SURGICAL INSTRUMENT CLEANING

The Key Surgical Instrument Cleaning line is designed to provide you with the brushes needed to clean your surgical instruments. Our wide variety of cleaning brushes ensures you and your team have the right brush at the right time.

With bristles available in nylon, brass, polypropylene or stainless steel, we also provide an incredible variety of lengths and diameters to fit your needs.

For organization of your cleaning brushes, our brush organizer is perfect for hanging in the department. Our stainless steel organizer is easy to keep clean and helps your team choose the right brush in a more efficient manner.

With our vast assortment of brushes - from channel cleaning to scope cleaning to sterilizer cleaning - we can help you match the right brush to the right cleaning task at hand.

Channel Cleaning Brushes

Pipe Cleaners

Toothbrush-Style Cleaning Brushes

General Instrument Cleaning Brushes

Scope Cleaning Brushes

Brush Assortments

Sterilizer Cleaning Brushes

Brush Organizer

A LITTLE BIT ABOUT...

Brian O'Connell

Job Title: **President and Chief Operating Officer**

Who inspires you? **Great scientific thinkers; like Einstein and Stephen Hawking.** What is your favorite thing to watch on TV? **Anything on the Science Channel, Smithsonian Channel, or any episode of The Sopranos.** If you were to perform in the circus, what would you perform? **Some sort of aerial act for sure.** If you could be a teacher of something, what would it be? **Astronomy. I find the science and physics of the universe incredibly interesting. Quantum theory and black holes – remarkable.** Who was your favorite band growing up? And your favorite band now? **Growing up – The Who. Now, pretty much anything AOC (adult oriented contemporary). Groups like Muse, Bon Iver, Daft Punk as well as Roxy Music, David Bowie, and Split Enz.** What do you do to relax? **Play golf.**

FUN FACT:

The three women who started Key Surgical in 1988 had years of experience in both the nursing profession and the medical supply industry. They were motivated by the growing need for a single-source supplier that would provide excellent products and equally excellent customer service. One of the founders is Gail Milchman, the mother of our CEO, Scot Milchman.

KEY SURGICAL TAGS

Locking Tags are designed to help you identify your instruments, trays, and carts as they move from sterilization to staging areas to procedures. Our tags allow you to indicate special handling instructions, secure trays, and carts from tampering and quickly identify priority instruments for repair and sterilization. Tags are available in a wide range of styles, colors, and locking configurations. Printed tags with special handling instructions, as well as uniquely numbered tags, are available as a standard product. Need a customized tag? We can do that for you!

Breakaway Tags are also available in a range of colors and can be written on with a permanent lab marker. They must be cut or broken to open, providing a secure lock.

Write-On Tags and Smart Tags allow you to write specific handling instructions on each tag when more detailed communication is necessary. These tags attach to instruments and trays with ties and are larger and more visible than our other tags, ensuring that detailed instructions will be seen by all. Smart Tags include detachable barcodes for even easier follow-up.

Scope Tags are designed specifically with the needs of scope processing and care in mind. Perfect for recording important details and available in seven bright colors for easy color-coding. Attached loops make for a convenient one-piece tag.

Metal Tray Tags easily clip onto the edge of a tray and provide ample space for identification, tracking and barcoding needs. Stainless steel for durability.

A LITTLE BIT ABOUT...

Scot Milchman

Job Title: **Chief Executive Officer**

What is something you've always wanted to try but been too afraid to? **Paragliding.** What 3 historical characters would you invite to dinner? **Lincoln, Einstein, & Socrates.** What are some causes you care about? **Causes that help support and improve the lives of those with disabilities and underprivileged children.** What cheers you up? **Just about everything.** If you could be any age for a week, what age would it be and why? **90. Why not experience something I haven't before?** What would the title of your autobiography be? **Life's Too Short for Terrible Wine.**

⚠ ***WARNING:** This product can expose you to chemicals including benzophenone, which is known in the State of California to cause cancer. For more information go to www.p65warnings.ca.gov.

KEY SURGICAL PERSONAL PROTECTIVE EQUIPMENT

Face Shields are available in several styles to fit the preferences of every individual. We offer full and short face shields, face shields with masks, with Tyvek™ expanders, with ties and with ear loops. All of our face shields offer different types of protection.

Barrier Gowns and Sleeves are lightweight, comfortable, and breathable.

Sterilizer Mitts are available in terry cloth or silicone. Cloth mitts provide you with a steam barrier for removing hot trays and racks from the sterilizer and are available in two lengths to protect most arm sizes. Silicone mitts are waterproof and heat resistant up to 480°F.

Nitrile gloves are powder-free, available in three lengths (9", 12", 24"). The 9" gloves have micro textured fingertips designed to increase dexterity and functionality and are incredibly durable. Our 24" nitrile gloves offer the most protection. They are treated with an antibacterial and anti-mildew agent and are also reusable.

Cleanroom Coveralls, Bouffant Caps, Masks, Beard Covers, and Shoe Covers are designed for use in cleanroom environments.

Adhesive Mats are designed to effectively capture dirt and dust particles from foot traffic.

1 - Bacterial Filtration Efficiency (BFE)

BFE is the effectiveness of a material to filter (prevent passage of) bacteria of a specified particle size, 3.0 µm (micron) ± µm. This is expressed as a percentage of a quantity that does not pass through the material.

2 - Particle Filtration Efficiency (PFE)

PFE is the effectiveness of a material to filter aerosol particles in the size range 0.1 µm to 5.0 µm. This is expressed as a percentage of a quantity that does not pass through the material.

D	PS-6502	x-large	300/box

ADHESIVE MATS

Designed to effectively capture dirt and dust particles from foot-traffic and equipment wheels before they enter a controlled environment. Each numbered layer of the mat peels off easily to reveal a new clean surface. Acrylic adhesive layers in the mat do not support microbial growth.

E	CR-32645-30	26" x 45"	120/box (30 mats/pad, 4 pads/box)

STERILE PROCESSING PRODUCTS

Micro Mesh Trays and Mesh Trays hold smaller items that are difficult to keep track of during sterilization, as well as larger items with small parts. Our Mesh Trays, Instrument Trays, Pans, and Covers are heavy-duty stainless steel, for a tough, clean, and corrosion-resistant surface.

Surgical Tray Corner Protectors can be used with various trays and containers to help prevent wrap tears and wet packs.

Instrument Stringers are available in a wide selection of sizes and closure types, including Ball & Socket, Spring Lock, Pull-to-Open, Center Lock, U-Shaped, T-Bar, and Stringer Stand. Our Instrument Stringer Stand allows for vertical placement of instruments. No matter what your closure or style preference is, our stainless steel stringers are durable and versatile.

Sterilization Wrap is designed for use with EtO and steam sterilization. Highly permeable and durable, the wrap has a consistent texture giving you visual detection of small pinholes and tears. Process Indicator Tape, for use with steam sterilization, is used with wrap to distinguish between a processed and unprocessed wrapped set.

Bowie-Dick test packs, available in both disposable and reusable types, are used in pre-vacuum steam sterilizers. They are used to detect air leaks and inadequate air removal.

PLASTIC STERILIZATION TRAYS

Designed for use with smaller or delicate instruments during sterilization and storage. Medical-grade silicone finger mats help protect and organize instruments within the tray. Perforated, slotted base and lid assist with circulation of steam during sterilization. Raised nodes in base assist with easy removal of silicone mat when needed. Transparent lid allows for easy viewing of contents. Compatible with steam and gas plasma sterilization.

	Number	Details	Length	Width	Height	Quantity/pkg

	CS-BD025	Lantor Cube® Bowie-Dick Test Pack	25 tests/box

BOWIE-DICK TEST PACK – Single Use

Bowie-Dick Test Pack has instructions for use pre-printed on the box for ease of use and staff training. Test sheet is easy to read and interpret. Certified to meet AAMI standards for daily air removal and steam penetration in pre-vacuum steam sterilizers.

B	CS-BD030	Airview™ Bowie-Dick Test Pack	30 packs/case

PROCESS INDICATOR TAPE

Distinguishes processed from unprocessed items. Adheres well to woven and non-woven materials. Distinct color change after exposure to steam sterilization (white to black stripes). *This product contains trace amounts of natural rubber latex.

	Number	Width inches/mm	Length ft/meters	Quantity
C	CS-75S	.75"/18mm	180ft/55m	24 rolls/box
D	CS-100S	1"/24mm	180ft/55m	24 rolls/box

TAPE DISPENSER

Heavy-duty metal frame with slip-resistant base. 3" core. Designed to hold and dispense Process Indicator Tape. Cuts tape quickly and evenly. Safety blade cover for user safety.

	Number	Details	Quantity
E	CS-DISP-10	holds single roll of 1" wide tape	1/pkg
F	CS-DISP-11	holds two rolls of 1" wide tape or one roll of 2" wide tape	1/pkg

KEY SURGICAL IDENTIFICATION TAPE

Our Identification Tape is designed to help you organize and identify instruments as they move between sterile processing and various departments. Using tape can help save you time, effort, and money by offering effective organization and identification of your surgical instrumentation. It is easy to apply and is compatible with steam sterilization. We have the broadest selection of tape available and it is colorful, easy to use, and economical.

Roll Tape is available in nine solid colors and three widths, while our Sheet Tape is available in over 250 colors and patterns. We are happy to help you customize your own identification tape as well!

Adhesive Remover is an instrument-friendly solution that helps remove identification tape. It is California Air Resources Board (CARB) compliant and biodegradable. It dissolves adhesive residue quickly and easily and restores instrument surfaces to their original condition.

ENDOSCOPY PRODUCTS

During an upper GI procedure, it's important that the patient's mouth remain open and that the scope itself is protected from damage during use. Bite blocks are an effective accessory that provide this type of protection. Available in adult or pediatric sizes, our bite blocks include a pliable strap that can be adjusted to ensure comfort for the patient as well as make sure the bite block stays put. We also offer a specialized bite block design that is used to help with oxygen delivery and also helps monitor CO_2 levels during the procedure.

Having the right tools for pre-cleaning (and the manual cleaning process before high level disinfection) is vital and the endoscopy sponges are designed for this specific task. Available as a dry or a conveniently pre-saturated sponge, these sponges are contoured to help quickly and effectively remove gross soil from an endoscope.

It's important to protect the fragile tip of an endoscope during storage and transportation; using our endoscope tip protector can help do just that. Simply slide the tip protector over the distal tip of the endoscope before storing or transporting. A star-shaped cut through the middle helps hold it in place.

Specimen caddies help organize biopsy specimen vials. Available in two compact sizes, the caddies are also marked either alphabetically or numerically for quick identification needs. Made from durable, easy to clean acrylic, the specimen caddies hold specimens securely and prevent spillage.

Save space in your department or lab by using a wall mounted dispenser for personal protective equipment such as gloves. The glove dispenser box holds a variety of box sizes and is constructed of ABS plastic, making it durable and easy to keep clean.

Endoscopy Products – Endoscopy Sponges, Endoscope Tip Protector, and Mesh Bag

ENDOSCOPY SPONGES

Designed to help remove gross soil from an endoscope during the pre-cleaning and cleaning process. MetriSponge® is conveniently pre-saturated with MetriZyme® dual enzymatic detergent (contains two proteolytic enzymes in a powerful solution). Endo Scrub Sponge is a dry sponge. Both sponges have a contour shape that helps the sponge wrap around the endoscope for effective 360° cleaning. Single use.

	Number	Details	Quantity
A	ES-88	MetriSponge®, pre-saturated with enzymatic	100/case (4 boxes of 25)
B	ES-50	Endo Scrub Sponge, dry sponge	50/pkg

ENDOSCOPE TIP PROTECTOR

Designed to protect an endoscope during transport and storage. Fits all flexible endoscopes. Star-shaped cut through the middle helps keep it in place. Single use.

	Number	Details	Length	Diameter	Quantity/pkg
C	EN-900	porous foam, green	5.5"	1.75"	50

MESH BAG

Helps keep small parts and accessories (such as endoscope valves) together during washing, disinfection, and/or sterilization. Constructed from durable, yet lightweight, polyester. Compatible with high level disinfectants, gas plasma, and EtO sterilization. Reusable.

	Number	Details	Dimensions	Quantity/pkg

KEY SURGICAL O.R. PRODUCTS

Key Surgical O.R. Products are designed for use in the operating room or post-procedure. Our line of surgical supplies includes Vascular Booties, Vascular Loops, Clamp Covers, Sterile Labels, Time Out Visuals, Hand Immobilizers, Skin Markers, Basins, Bowls, Cups, and more.

Vascular Booties, Vascular Loops, and Clamp Covers are available in a variety of colors and sizes to fit your particular needs. As always, we package our O.R. products in convenient quantities to help reduce waste and keep costs down.

Sterile Labels are designed to help clearly identify medications, medication containers, and other solutions in compliance with The Joint Commission (TJC) requirements.

Time Out Visuals help create and reinforce a culture of patient safety in compliance with TJC Universal Protocol. Our visuals prompt all members of the surgical team to take a time out prior to the start of any procedure.

Basins, Bowls, and Cups are available both in high quality stainless steel and durable plastic. These products are designed for easy cleaning, easy pouring, and stability in a variety of shapes and sizes.

A LITTLE BIT ABOUT...

John Savage

Job Title: **CHIEF FINANCIAL OFFICER**

What cheers you up? **My wife and kids – just thinking about them puts a smile on my face.** What are some causes you care about? **Like a lot of people, I have lost loved ones to cancer. I'm passionate about funding for cancer research and finding natural cures.** If you had a band, what would you name it? **I can't sing or play any instruments, but if Pearl Jam ever needs a replacement I'm their guy!! I know all the songs.**

HAND IMMOBILIZERS

Positions and immobilizes the hand during surgical procedures. Alumi-Hand® is made of aluminum and is lead free and ready-to-use. DuraHand® is also made of aluminum and is lead free. DuraHand can withstand multiple sterilization cycles and manipulations. Both have an anti-tilt tab that prevents rotation of the arm.

KEY SURGICAL WIRE AND PIN MANAGEMENT

We offer the highest quality and the broadest selection of wires and pins for a variety of procedures as well as dispensers, sterilization racks, pin covers, cutters, and pliers.

K-Wires and Steinmann Pins are available in various diameters and lengths. Our high quality wires and pins are made from certified implantable stainless steel and are precision ground in Germany.

Wire Dispensers are available in various lengths and in single and multiple-chamber designs. Chamber dimension markings are clear and easy to read, and the dispensers are perforated for proper sterilization. Sterilization Racks are perfect for organizing your wires and pins and fold closed for easy sterilization and storage, and open to a table top position for ease of use. Our K-Wire Ruler and Pin Gauge is a practical tool to measure wires and pins.

Pin Covers are offered in a wide range of sizes. With two covers to a package and twelve packages to a box, you can order quantities that are economical and fit your specific needs.

Wire and Pin Management – Sterilization Racks & Pin Gauge

STERILIZATION RACKS

Sterilization racks are designed for use during washing, sterilizing, storing/transporting, and dispensing K-wires, Steinmann Pins, or Twist Drills. The racks are lightweight but made to withstand repeated use. They fold closed for sterilization and easily open to convert to a table top stand for use in the O.R. Dimensions are clearly marked on the rack to assist with quick identification.

K-Wire and Pin Rack

	Number	Details	Dimensions	Quantity/pkg
Ⓐ	KI-71-RACK	anodized aluminum, holds 9" K-wires and pins Holds 6 of each of the following diameters: .028" (.7mm) .045" (1.1mm) .062" (1.6mm) .093" (2.4mm) .125" (3.2mm) .156" (4.0mm) .035" (.9mm) .054" (1.4mm) .078" (2.0mm) 109" (2.8mm) .140" (3.5mm) .177" (4.5mm)	12.5" x 5.25" x 1.5" (32 x 13 x 3.8cm)	1

K-Wire Rack

Ⓑ	KI-71-RACK-46	anodized aluminum, holds 4-6" K-wires Holds 6 of each of the following diameters: .028" (.7mm) .045" (1.1mm) .062" (1.6mm) .035" (.9mm) .054" (1.4mm)	6.25" x 4.125" x .75" (15.9 x 10.5 x 1.9cm)	1

Twist Drill Rack

Ⓒ	KI-05-RACK-TD	O.R. quality stainless steel, holds 5" twist drill bits Holds the following diameters and quantities: 1.5mm (2) 2.0mm (2) 2.7mm (1) 3.2mm (1) 3.5mm (1) 4.0mm (1) 4.5mm (1) 4.7mm (1) 5.0mm (1)	6.75" x 4.25" x .71" (17.1 x 10.5 x 1.8cm)	1

K-WIRE RULER AND PIN GAUGE

Measure 16 sizes of K-wire and pin lengths in inches, millimeters, and centimeters as well as diameters. Made from 420-series stainless steel with .025" thickness for durability.

KEY SURGICAL INSTRUMENTS

Key Surgical Instruments are designed for precision, balance, and durability. We offer a line of instruments in plastic as well as in three grades of stainless steel. So whether you're looking for a disposable towel clamp for hands-free convenience or a super-cut scissor with long lasting, razor sharp edges, we have the instrument you need.

Utility Scissors are designed with stainless steel blades that are perfect for cutting bandages, casts, tubing, and drapes. Our selection of bright colors and two sizes just about guarantees that everyone will find their favorite pair.

Plastic Instruments are constructed of plastic that is designed to perform under the toughest conditions. These sterilizable instruments are perfect whether you need a secure, non-perforating hold or a pair of lightweight, disposable forceps.

Stainless Steel Instruments are available in three grades: Floor Grade, O.R. Quality, and German. Floor Grade Instruments are made of stainless steel and are great for a range of surgical services.

O.R. Quality Instruments are constructed out of a mid-grade stainless steel. Available in a variety of instrument styles, they represent the best value in surgical instruments.

German Instruments represent the highest level of instrumentation available today. These instruments are constructed out of 1.4021 German stainless steel, the equivalent of 420 American stainless steel. They have also been heat treated to increase hardness and passivated to protect against rust.

DID YOU KNOW?

Surgical instruments from Key Surgical have had a special role in surgeries in countries such as Bangladesh, Ethiopia, Ghana, Haiti, Liberia, Mexico, Peru, Tunisia, and Vietnam. Each year, Key Surgical works closely with Children's Surgery International, a Minnesota-based nonprofit volunteer organization that provides specialized medical and surgical services to underprivileged children around the world. Donation of surgical instruments from Key Surgical helps Children's Surgery International continue to bring their mission to life.

KEY SURGICAL INSTRUMENT TRACKING

Key Surgical's KeyDot® is a highly effective and affordable solution for tracking individual surgical instruments beyond the tray level. KeyDot is an easy, and economical way to get the most from an asset tracking system and to maximize your return on investment. It can be used to track specialty, high-value, or peel-pack items on an individual basis. Whatever the application, KeyDot helps provide increased efficiency, accuracy, and productivity in tray assembly, general instrument identification, instrument inventory status, and management.

The KeyDot is a small, laser-etched, 2D Data Matrix barcode label that can be applied directly to an instrument's surface. Tested for sterilization efficacy and biocompatibility for use on stainless steel surgical instruments, it has been conveniently incorporated into most of the instrument tracking software applications available today.

With the KeyDot there is no specialized training or intricate equipment needed so application can be done on-site, eliminating the hassle of sending your instrument sets out for this tracking solution.

PLEASE NOTE: Unless specified, all products are not made with natural rubber latex.

HOW DOES KEYDOT WORK?

The KeyDot works like a license plate. It links a specific instrument to a data file within a software application, allowing that instrument to be tracked throughout the complete instrument processing cycle. Instruments marked with the KeyDot are scanned using a two-dimensional barcode reader. Scanners and software applications not available through Key Surgical.

THE KEYDOT IS EFFICIENT

KeyDot provides you with the convenience to decide what to mark and when to mark it – you're in control. Since there are no equipment requirements or complicated procedures and training involved, instruments can be marked with a KeyDot on a continuous basis by anyone in your department, starting with critical instruments and expanding at an individual pace.

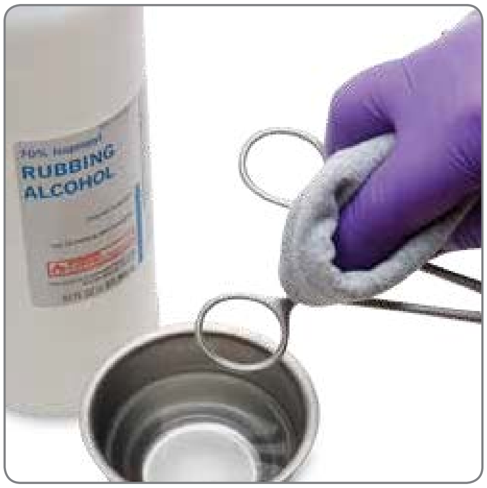
KEYDOT IS ECONOMICAL

For most applications, the cost of KeyDot labels is around fifty cents each. Plus, there is no need to rent, lease, or purchase any expensive equipment and no need to send instruments off-site. With the KeyDot, there is a quick realization of return on your instrument tracking investment.

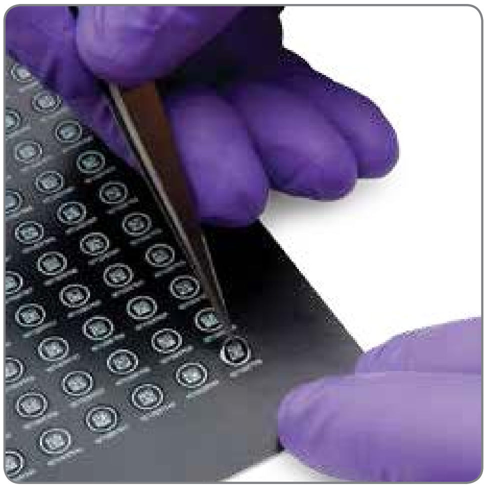
KEYDOT IS EASY

With the KeyDot there is no specialized training or intricate equipment required. Applying a KeyDot to a surgical instrument is quick and easy: simply clean, lift, place, and press. The instrument then needs to be sterilized to cure the adhesive and assure firm adhesion.

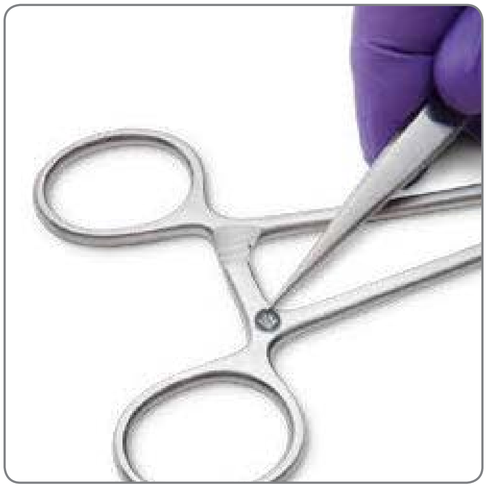
1 clean application area



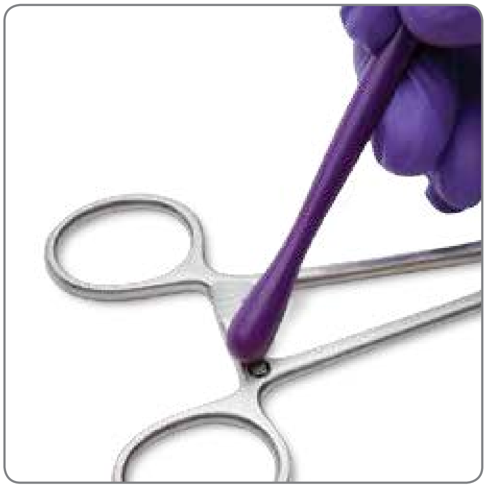
2 lift KeyDot from sheet



3 place KeyDot on instrument



4 apply firm pressure and sterilize to secure adhesive



FREQUENTLY ASKED QUESTIONS

How long will our KeyDot last?

KeyDot labels will remain readable for at least 200 processing cycles or two years, whichever comes first. The radial design of the KeyDot means there are no corners to lift up. The Data Matrix barcode is also highly redundant – even if up to 60% of the barcode is destroyed, the KeyDot is still readable. The KeyDot is designed to withstand harsh environmental and temperature conditions. If a KeyDot needs to be replaced, anyone can do it at a convenient time in a matter of seconds. And at around fifty cents per dot, the KeyDot remains an easy, efficient and economical way to mark instruments for the life of the instrument.

Is the KeyDot safe for our surgical instruments?

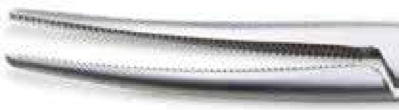
Yes. A licensed, independent medical testing laboratory has scientifically evaluated the KeyDot and found that the instrument surfaces under the KeyDot are completely sterilized during processing.

Do I have to program the KeyDots with my own numbers?

No. All KeyDots are manufactured and shipped with a unique number. We guarantee that there will be no duplicate numbers in the labeling sequence. Custom sequences can also be requested. Simply apply the KeyDot and easily link it to the appropriate data file in your software application.

How many characters are allowed on each KeyDot?

Human readable equivalents appear on the 1/8" and 3/16" KeyDot (up to 15 characters) and on the 1/4" and 3/8" (up to 17 characters).



KEYDOT GUARANTEE

Key Surgical guarantees that our KeyDot labels will remain readable for at least 200 processing cycles or two years, whichever comes first. Simply send us the supporting documentation from your instrument tracking system and we will replace, free of charge, any KeyDot that does not meet our performance benchmark.

Instrument Tracking – KeyDot

KEYDOT
Alphanumeric barcodes are laser engraved on .003” destructible acrylate. 2D Data Matrix. Black background with white copy. Pressure-sensitive acrylic adhesive. Label copy includes barcode and human readable equivalents on the 1/4" and 3/8" KeyDot. 100 KeyDot labels per sheet.
